

### Lao line-breaking issue

The following example (with increasing window width) shows one situation where the line breaking algorithm used by Chrome, Safari (MacOS) and iOS could be improved. Although in strict usage, ຫມ should always be used word (or syllable) initially, ຫມ is very widely used. In most cases (as in the example) this is quite unambiguous, as in Lao ຫ can never be used syllable-finally.

ກັບຊີມີເຄື່ອງ	Correct breaking
ກັບຊີມີເຄື່ອງຫ	Incorrect breaking
ກັບຊີມີເຄື່ອງຫມາຍ	Correct breaking
